

Cold Hardy Frontenac gris Grape Variety

Technology No. z02115

Cold Hardy Frontenac gris Grape Variety for Winemaking

Frontenac gris wines present aromas of peach and apricot with hints of enticing citrus and tropical fruit. A brilliant balance of fruit and acidity creates lively, refreshing wines. Unique and complex flavors make the Frontenac gris grape excellent for table, dessert and ice wines. Frontenac gris vines are “grower-friendly” due to their winter hardiness, disease resistance, strong vigor, desirable growth habitat and high yield potential. Frontenac gris has proven sufficiently cold hardy for consistent production in central Minnesota where temperatures frequently reach -30°F when good viticulture practices are used.
