Cold Hardy La Crescent Grape Variety for White Wine

The La Crescent grape is a very cold hardy grape cultivar that produces a white wine of excellent quality, reminiscent of the cultivar Vignoles. Its relatively high sugar and acidity levels have encouraged winemakers to ferment La Crescent in a sweet or semi-sweet style. La Crescent wines commonly have aromas of apricot, peach, citrus and pineapple and lack strong herbaceous aromas or those associated with *V. labrusca*. La Crescent vines have tolerated vineyard temperatures as low as -36 F in early February with only minor bud loss. It ripens in mid-season. For more information please visit the [University of Minnesota's Cold Hardy Grapes](#).
