

ShadowGlo™ Grape Variety for Superior Fruit Innovation™ Grower Members

Technology ID

2020-374

[View online](#)

Description

ShadowGlo™ brand grapes are produced by the 'MN 1325' table grapes developed by the University of Minnesota. Part of the NortherGlo™ series of grapes, these cold hardy seedless table grapes will add a little dark mystery to your vineyard!

EmberGlo grapes have a midnight-blue to black skin and unique mildly tart flavor. These grapes mature in mid September, adding a snappy new fruit to your fall lineup!

License agreement coming soon!
